

How to make the most of your brown bin

If you put the wrong materials in the brown bin, we may reject it. If you are unsure, please contact us.

You may wish to consider mixing materials in your brown bin to ensure that it does not compact, making it more difficult to empty. Although brown bins can only currently accept garden waste, there are other options for both reducing and managing food waste. Please see the 'Reduce and Reuse...A More Sustainable Lifestyle' section on this website.

For those householders with larger gardens, you may wish to consider managing some of the garden waste at home by following some of the simple measures outlined in the 'Home Composting' section. Alternatively, there are facilities at both Household Recycling Centres for the collection of garden waste. The Knock Road Household Recycling Centre has extended summer opening hours commencing on 1st April each year for your convenience. Please contact 028 2766 0257 for details or see the Household Recycling Centres' section.
